

## Game Presentation

Buddyfish by M3AT

Type : Platforming

Platforms : **PC, Mobiles**

# Story

- Buddyfish's story takes place in Venice who's being targeted by a bacteria invasion threatening the whole city.
- The player leads Buddyfish, a brave fish in charge of cleaning Venice's waters by eating all bacterias spread through the islands (Cannaregio, Dorsaduro, San Marco)
- The further Buddyfish will get, the harder creatures and levels will be.

# How to play ?

- Buddyfish takes place underwater and is mix of games like Pacman and Mario.
- The goal is simple : Eat as much bacterias as possible in order to get the best score.
- During his quest, Buddyfish will face different types of obstacles from crabs to sea urchins and gondoliers that he'll have to dodge in order to go through levels.

# Characters

## **Buddyfish :**

The main character, as cute as brave !

## **Bacterias :**

Game's antagonists. They can be eaten by Buddyfish, and hide behind obstacles and seaweeds.

# Characters

## Obstacles :

Obstacles are components tasked to make Buddyfish's life difficult, forcing him to dodge them. Obstacles can go from gondoliers to crabs.

## Boss :

At the end of each island, Buddyfish is chased by a giant and dangerous Boss (shark, seagul). Once he's beaten, the island is freed from bacterias.

# Features

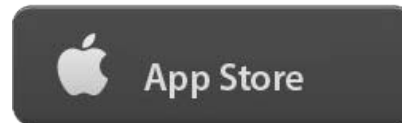

- An innovative game taking its inspiration from classics.
- Perfect for snack-gaming in the bus or metro and also adapted for longer sessions.
- More than 50 levels to explore and 6 islands to discover.
- Completely free.

# Release informations

Buddyfish will be available on PC (via web browser), iOS (iPhone, iPad) and Android (Samsung Galaxy, Google Nexus) by the end of the year.

You can test a beta version of the game right now on :
